X800

The ultimate recliner lounge bed
from gaming to reading to sleeping

Comfort Settings include: Head, upper body, foot and lounge positions help you find the ideal position from head to toe for gaming, watching TV, reading, or simply relaxing + Dual body massage features two zones, seven wave intensities and a full-body mode to help you recover from workouts or long days + There is an extra 15° of head tilt and a -18° for the Ulti-MATE recliner lounge bed

Convenience: The intelligent “wall hugger” frame design means that the nightstand stays within easy reach, even at the highest head position + The frame fits most standard headboards

Technology: The wireless, 18-button backlit remote gives you access to a wide range of resting and sleeping positions, including massage modes and two memory buttons + Unique visual angle monitor shows your position at all times. + USB charging ports on either side of the bed let you plug in smartphones and tablets within easy reach, and without taking up precious outlet space + Optional Ultii-MATE Sleep Systems app (Android and iOS) syncs via Bluetooth to turn your smartphone or tablet into a remote

Reliability: The frame has a 700-pound weight capacity + An electronic linear actuator can apply 6000 Newtons of force to move the frame’s movement quietly and consistently, and is virtually maintenance free + Steel frame

Safety: Exceptional ergonomics for whatever you do. The “wall hugger” frame design does more than keep you aligned with your nightstand – the frame literally moves in as you raise the foot of the bed, eliminating any horizontal gap + A standard retainer bar keeps the mattress in place as you raise or lower it + LED underbed lighting illuminates the area around the bed if you have to get up during the night + Backup power down lets you move the bed into a horizontal position in case of a power outage

Value: Amazing ergonomics for a range of activities, plus exceptional functionality, technology, reliability and safety, all at an amazing price
